- Back end development experience building service features and server generated websites.
- Worked on React apps as part of internal projects

Florida Department of Corrections

Apr. 2020 – October 2024

Software Engineer from Launch

Remote

- Multiple new apps in Angular 18, many consumed by several developer pods as NPM package in Azure DevOps
- Main app was focused on development of customized, feature-heavy table displays utilizing Angular Material
- Fast paced contract where client received many features each sprint - MVP achieved with 100% test coverage

Exelon

Feb. 2023 – Apr. 2024

Software Engineer from Launch

Remote

- Created custom features for Content Management System (Content Stack)
- Developed sidebar extensions in Angular 16 & Express.js to pull data & generate content for content creators
- Developed command line scripts in NodeJS for content managers to do bulk transformations/migrations of content
- Worked on customer-facing front end app in Angular to display content from Content Stack

Bill.com

Jun. 2020 – Jan. 2023

Software Engineer from Launch

Remote

- Developed customer-facing website for paying/receiving bills, customer service portal, and Bill.com Quickbooks Online app
- Worked on front-end application developing new sign up experience and first time user experience with Angular 16
- Worked on backend side of apps using Java with Spring framework and Oracle Database
- Worked on reusable, common components for front-end apps in Angular 16 and Web Components
- Raised front-end app test coverage to over 75% using Jest
- Brought website to ADA compliance, accessibility constantly implemented while developing reusable components
- Worked on customer service portal in Java, HTML, Oracle Database, and Okta platform for customer service agents
- Worked on Quickbooks Online app for payments and drive new registration of Bill.com with AngularJS and Java
- Gained onboarding experience by bringing on both front-end and back-end developers to Quickbooks Online app

Roadrunner Transportation Services

Feb. 2020 – May. 2020

Software Engineer from Launch

Ann Arbor, MI

- Developed front-end application for in-house invoicing, price estimation for shipping, and shipping logistics
- Angular front end; worked with a .NET-based backend involving Microsoft Azure database and storage blobs
- Accounting-related UI/UX, such as invoices table and pagination for table

Iconoclasm

May 2019 – Sep. 2019

Web Developer

- React front end development for website where users can upload reverse engineered malware code
- Django & MongoDB back end development
